Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary**Application No.**

09/499,369

Applicant(s)

WAKABAYASHI, TOSHITSUGU

Examiner

Trang U. Tran

Art Unit

2622

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 26 December 2007.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-4, 6-10, 12-16 and 18 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☒ Claim(s) 1-4, 6-10, 16 and 18 is/are allowed.
- 6) ☒ Claim(s) 12-15 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
- Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
- Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☒ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☒ All b) ☐ Some * c) ☐ None of:
1. ☒ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- 1) ☐ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☐ Information Disclosure Statement(s) (PTO/SB/C)
- 4) ☐ Interview Summary (PTO-413)
- 5) ☐ Notice of Informal Patent Application
- 6) ☐ Other: _____
- Paper No(s)/Mail Date _____

DETAILED ACTION

Response to Arguments

1. Applicant's arguments filed Dec. 26, 2007 have been fully considered but they are not persuasive.

In re pages 8-9, applicant argues that Nishino Kenji fails to teach inputting in to the cathode-ray tube an image signal in which the frequency characteristic has already been varied and a primary and secondary winding from a coil and a control circuit as claimed.

In response, the examiner respectfully disagrees. Nishino Kenji discloses in paragraph #0021 that coil L1 which is attached in the color neck of a cathode-ray tube section and in paragraph #0031 that "Three primary color (red, green, blue) electron beams of level in-line arrangement. It is slightly shaken at a longitudinal direction and the moiré by the level spatial-frequency component is reduced by what the display position of the color video signal supplied to a color cathode-ray tube is slightly shifted by right and left for every line (the amount can carry out adjustable by adjustment of a potentiometer 19)". From the above passage, it is clear that the frequency characteristic of the color signal (red, green, and blue) has already been varied (slightly shifted by right and left for every line) will be inputted to the cathode-ray tube. It is further noted that L1 is a coil and L2 is another coil. Coils are considered to be winding. Either L1 or L2 can be primary and other coil can be secondary. Thus, the L1 and L2 coils anticipate the claimed primary and secondary windings. L1 and L2 are controlled to reduce moiré as claimed.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

3. Claims 12-15 are rejected under 35 U.S.C. 102(a) as being anticipate by Kenji (JP Patent No. 06-12195).

In considering claim 12, Nishino Kenji discloses all the claimed subject matter, note 1) the claimed passing said image signal through a primary winding is met by coils L1 and L2 (see the abstract and page 2, [0020]-[0023]), 2) the claimed varying a frequency characteristic of the image signal by controlling current passing through a secondary winding to vary an inductance value of said primary winding in said periodic manner is met by the circuit 10 generates an alternating voltage, and a horizontal and vertical alternating magnetic field is generated at coils L1 and L2, then, three horizontal in-line arranged original color electronic beams are horizontal vibrated a little, and the display position of a color video signal supplied to a color cathode ray tube is horizontal shifted a little by each line (see the abstract and page 2, [0020]-[0023]), and 3) the claimed inputting the image signal with said frequency characteristic having been varied to a cathode-ray tube is met by paragraph #0031 that "Three primary color (red, green, blue) electron beams of level in-line arrangement. It is slightly shaken at a longitudinal direction and the moiré by the level spatial-frequency component is reduced by what the display position of the color video signal supplied to a color cathode-ray tube is slightly

shifted by right and left for every line (the amount can carry out adjustable by adjustment of a potentiometer 19)".

In considering claim 13, the claimed wherein the image is divided into spatial lines and temporal frames, and said step of periodically varying alters said frequency characteristic once per spatial line in each temporal frame is met by the video image (see the abstract and page 2, [0020]-[0023]).

In considering claim 14, the claimed wherein said step of periodically varying also alters said frequency characteristic once per said temporal frame in each said spatial line is met by a coil L1 and L2 (Fig. 5, page 2, [0020]-[0023] of Nishino Kenji).

In considering claim 15, the claimed wherein controlling current passing through said secondary winding is performed by alternately opening and closing the secondary winding in said periodic manner is met by a coil L1 and L2 (Fig. 5, page 2, [0020]-[0023] of Nishino Kenji).

Allowable Subject Matter

4. Claims 1-4, 6-10, 16 and 18 are allowed as stated in the last Office Action.

Conclusion

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Trang U. Tran whose telephone number is (571) 272-7358. The examiner can normally be reached on 9:00 AM - 6:30 PM, Monday to Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David L. Ometz can be reached on (571) 272-7593. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
